Set Tasksheet

Q.1 You have been given 2 sets named engineers, phd_holders.

engineers = {"Ram", "Shyam", "Radha", "Mohan", "Geeta", "Sunita"}

phd_holders = {"Krishna", "Ram", "Rakesh", "Mohan", "Annirudh", "Geeta"}

solve all below mentioned condition using set methods

- i) Find out a set of those who are engineers but not phd_holders
- ii) Find out a set of those who are phd_holders but not engineers
- iii) Find out a set of those who either phd_holders or engineers
- iv) Find out a set of those who are both phd_holders and engineers
- v) Generate a new set in which every engineer and phd_holder is present only once.

Q. 2 Do the above question without using set methods.

Q. 3 What are properties of sets and how you can create an empty set.

Q.4 Write a program to find sum, average of all elements inside a set.

Q.5 What is frozen set, explain with an example.

Q.6 Differentiate among list, tuple, set and dictionary property wise.

Q.7 Can we make a nested set?

Q.8 What do you mean by sub set and super set. Is A sub set of B?

$A = \{1, 2, 3, 4, 5\}$

$B = \{2, 3\}$
