Dictionary Tasksheet

Q.1 Write a program to sort a dictionary in ascending/descending order by key and ascending/descending order by value.

Q.2 Write a program to create three dictionaries and concatenate them to create fourth dictionary.

Q.3 Suppose there are two dictionaries called boys and girls containing names as keys and ages as values. Write a program to merge the two dictionaries into a third dictionary.

Q.4 Create a dictionary of 10 user names and passwords. Receive the user name and password from keyboard and search for them in the dictionary. Print appropriate message on the screen based on whether a match is found or not.

Q.5) In the following table check the box if a property is supported by the data types mentioned in columns?

Property	str	list	tuple	set	dict
Object					
Collection					
Mutable					
Ordered					
Indexed by position					
Indexed by key					
Iterable					
Slicing allowed					
Nesting allowed					
Homogeneous elements					
Heterogeneous elements
